SUBJECT.

Repairs to the Bathing Ghat at Theertha da ru at Chunchankatte in the Yedatore Taluk.

From

The Chief Engineer of Mysore

Letter No. 7674 Dated 24 November 1907.

An Estimate amounting to Rs 8421- for constructing a Bathing Ghat at Theertha da ru at Chunchankatte in the Yedatore Taluk for the convenience of pilgrims resorting thereto at the time of the festivals of the Sri Rama-devaru temple at the place, was sanctioned in Govt Pro: No 752-3/Mus 7. 108 93 dated 10th January 1900, the charge being met from the sum available to the credit of the Sri Rama Devaru temple

The Deputy Commissioner

File No. of Mural Secretariat.

that the Sum of Rs 842/- sanctioned was not required for the work and that it could be completed at a cost of Rs 362-8-0 as per revised Estimate submitted by him which was accordingly sanctioned in Govt Pro no 2363-42 dy 9th Dec 1904. Dis no 146 dy 29 12 1904 Slip C. Slip D

After a lapse of 2 years, the Dy Commr reported that it was not possible to carry out the work according to the latter Estimate and that a Sum of Rs 842/- was necessary for the work as per original Estimate no 545 dy 30th April 1906 Slip E

Thereupon, the Chief Engineer of Dy Sec was requested to depute a competent Officer and to forward a proper Estimate prepared for the work in question.

He forwards a plan and Estimate amounting to Rs 2267/- (including the usual Establishment and tools and plant Charges) for the work in question and proposes that a plinth of Slabs on edges be substituted to box in the steps instead of the proposed parapet walls (Ch Engrs no 7674 dy 2nd Nov 1907 Paper under discussion)

Muzrai Secretariat. | File No. of 190

which are an unsatisfactory arrangement, as they offer such great obstruction to the water during floods.

The report of Mr. B Subba-Rao Executive Engineer, accompanying the Estimate, explains the necessity for incurring expenditure to the extent of Rs 2267 for the purpose. The temple has sufficient savings at its credit to bear the cost

Mr 81 29/12/99

I have the honor to forward herewith for Sanction an Estimate amounting to Rs 542-0-0 for Constructing a bathing ghat at Theertha-Kere at Chunchinkatte, Yedatore Taluk. The Amildar states that the Existing bathing ghat (Sopana ghatta) is very old and in a crumbling and dangerous state, and that it is necessary

I have 80 81 1-1900

no 752-3 dy 10-1-1900

the same and rebuild another in its stead, this, at present, very inconvenient to fetch "Agroodaka" to the temple from the river.

The Muzrai officer who recently visited the spot is also of opinion that no other place except that where the present Sopanagatta stands would afford a convenient approach from the river side to the temple and the reconstruction of the Sopanagatta in the same place, proposed by the Amildar will prove very useful not only for the daily conveyance of Agroodaka to the temple but also to the numerous visitors during the Jatra season.

The Treasury officer's certificate showing the amount of Savings at the credit of Sree Rama Devaru temple at Chamechandake from which the cost may be met is enclosed in the Estimate.

Dated 29th October 1903

Memorandum Road Dy. Bill,
Deputy Secretary Government of
Burma Civil Secretariat
Rangoon

Sir

I have the honour to forward herewith
the revised estimate for
Rs 362-8 for constructing a bathing ghat
at Chunchunkatte in the Mergui Island Taluk.
2 Out of the amount of Rs 842-0-0, sanctioned originally
in Government Proceedings No 752-100-9 dated
the 10th January 1900, a sum of Rs 284-4 was
was drawn by the contractor for collecting
materials, but the work has not as yet
been commenced. The Divisional Officer
after inspecting the spot thought that
there was no necessity to spend such a
large sum as was sanctioned originally
and that the work noted in the revised esti-
mate was essential.
3. The cost may be met from the sum
of Rs 2854-10-5 at the credit of the
Sri Rama's temple.
4. The correspondence on the subject

To Ananta Sami Rao Esquire B. A.,

Secretary to Government of His Highness the Maharaja of Mysore, Inam Department.

SIR,

With reference to your letter No. 5389 dated the 14th May 1906, calling for a proper estimate for constructing a earthen Ghat at Tirthakadu at Chunchankatte in the Yedatore taluk, I have the honor to forward the enclosed plan and estimate, amounting to Rs 2267 (including the usual establishment and tools and plant charges) received from the Superintending Engineer, Western Circle, for the work in question.

2. The proposed parapet walls are unsatisfactory arrangement, as they offer such great obstruction to the water during floods. In my opinion these parapet walls should therefore.

is omitted, and simply a plank of Mahogany edge substituted as here in the steps of the Executive Engineer will be instructed to see to this work during the execution of work.

3. The two estimates received with the letter under reply, are returned herewith.

I have the honour to be,

Report accompanying the Estimate of the probable cost of Constructing a Bathing Ghat at Thirthakadoo, Chunchanakatte in the Yedatora Taluk

18 1891

Report.

The accompanying Plan and Estimate provide for the construction of a Bathing Ghaut at Thirthakadoo, Chunchanakatte, in the Yedatora Taluk, got up in accordance with Superintending Engineer's docket No. 2405 of 31-5-06. (The place is at one end of Thirthakadoo and is locally known as Hunsinmaradakadu). The Sketch plan shows the relative position of the temple, the tram and steps. The bank of the River here is more or less of murram

uniform slope and earth is roughly 2 to 1, The steps will be laid with a general slope of 2 to 1, with landings in places. After removing the surface earth, the soil below, mostly hard and of soft rock - will be cut into rough steps on which a layer of Concrete in Surki mortar and brick stone in Surki mortar well laid with slabs on top as shown in the plans and Estimates. The clear width of the steps between parapets will 11' and the steps are proposed to be taken down right up to bed level River, so that the bathers may be able to bathe even in Summer at the foot of these steps -

Necessary works to prevent slabs land being washed away will be carried out and short

bearing cut bars and fixing them in lead with necessary clamps to prevent them being washed away

27.8.09

perforated. parapets will be built-
Below the steps and where the pilgrim
have to bathe the rock surface
will be levelled, concrete in
Surki mortar being laid where
needed.

Necessary arrangements
will also be made to admit of
water running to this place
even when water level is low
in the River.

11. The place is a difficult one
for work and special attention
and careful supervision are
necessary to make the work
stand during the floods
